	Small surfaces in area of treatment	Descosept AF & Descos. AF Lemon concentrate 1 min.	Spray solution on until surface is fully covered. Allow to dry. Wipe afterwards if necessary.	After each customer.	

Note:

- When using antiseptics and disinfectants, concentrations and soak-in times have to be observed.
- When using disinfectants which are not meant for use on the human body, protective gloves must be worn.
- Disinfectant solutions are always to be prepared with cold water.
- When dealing with blood, hands are to be protected from direct customer contact by the use of single-use gloves.

WEAR PROTECTIVE GLOVES!!!

This disinfection plan has been written on the basis of the requirements of BGV C8. Checking it for correctness and completeness is the user's responsibility.
